Dear Dr Elizabeth Ferguson,
Dear IVF Team,

I would like to apply to the Embryoology Laboratory Technician position advertised for the In-vitro Fertilisation Clinic, reference number **ARU011T**. I have just completed my third year at the University of Aberdeen in a BSc (Hons) of Human Embryology and Developmental Biology and I believe this is the right time to gain more professional experience related to my degree, before going into my fourth year.

As a student of Human Embryology, laboratory procedures are a core skill for my degree. More than this, these are the aspects that I enjoy the most and wish to expand as much as possible, beyond what university can offer me.

Kindest Regards,
Diana Andreea Judea
